RE: Manufacturer Name and Address for non-regulated products

For Non-Regulated products in which the Management of Change (MOC) code is designated as an N - Non-Regulated or NI - Non-Regulated with Limited Change Information, sourcing information is considered proprietary and is at the discretion of Avantor Performance Materials. Therefore, a manufacturer reference code is not reported on the CoFA.

If you are unsure what MOC code is assigned to the product, MOC codes are available in the product listing when you perform a product catalog search at <https://www.vwr.com/>

If you have any questions or require additional information, please contact Technical Services.

Revision History

Rev. 0; March 25, 2024 – New Document

Prepared by the Avantor
Technical Service Department

While the above information is provided in good faith and believed to be accurate as of the date provided, Avantor makes no representations or warranties as to the accuracy or completeness of such information. All Avantor products are subject to Avantor's terms and conditions of sale including the limitations of liability contained therein and any contrary terms and conditions are expressly rejected. As Avantor has no control over purchasers' uses of its products, Avantor expressly disclaims all liability with respect to same
